Brief description of the Assignment	<p>Drug addiction has become one of the major problems of the nation, a recent nationwide survey disseminated by National Institute of Mental Health (NIMH), Bangladesh revealed 3.3% adults are using any kind of substances within three months. According to the department of narcotics control, in 2017 alone a total of 40 million yaba tablets were seized. This is 11 million more than the previous year and almost 50 times more than in 2010. Once such large amounts of drugs enter Bangladesh across the border, no amount of operations will halt the drug trade within the country. Drugs must be stopped from the entry points. The geographical location of Bangladesh in between the golden triangle and golden crescent. That is why trafficking of illicit drugs and psychotropic substances are getting increased. Although Bangladesh is not a producing as well as supplying country of any narcotics drug, the number of drug abuse and addiction is increasing gradually day by day and one of the cause is increase trafficking. The government of Bangladesh has adopted the principle of zero tolerance to overcome the curse as well as come out from this evil situation. To identify the routes of drug trafficking and minimize the pitfalls will be strengthened the supply reduction principle. Under the above perspective, the department of narcotics control is working relentlessly for supply reduction along with law enforcing agencies.</p> <p>Therefore, this year, the department of narcotics control has taken up initiative for a research work to identify and mapping of routes and as well as to show the realization of the real truth to the mass people by making research activities more dynamic and improved. However, this document serves as ToR for the study which is titled as "Identifying and</p>

document serves as ToR for the study which is titled as "Identifying and mapping the routes of drug trafficking in Bangladesh: Pitfalls and way forward".

Name of the Study: "Identifying and mapping the routes of drug trafficking in Bangladesh: Pitfalls and way forward"

Overall Objective: The objective of the study is to identify all the routes of drug trafficking in Bangladesh intra border and also transportation process inside the country. By this research the limitations of agencies also are identified, why the routes are not being sealed anyway.

Broad areas of Study & Suggested data collection points: The study will have to do cover collection of data and cases from all the administrative districts in Bangladesh and special emphasis to the districts with international borders. This research is nationwide broad based research, non-randomized and be confidential, not to disseminate publicly. The several focus group discussions will be carried out. Groups are from law enforcing agencies, drug peddlers, civil societies, drug abusers, physicians and others. A semi structured questioner will be used by the researchers to estimate the pattern of routes, the strengths and limitations of law enforcing agencies and will be identified the pitfalls to seal the routes.

Scope of Work:

- ❖ To find out categories and types of routes for drug trafficking in the country;
- ❖ To list out of why these routes are exists.
- ❖ To identify the socio-cultural reasons for being development of the routes.
- ❖ To find out the whole transport cycle of drugs from border routes to users.
- ❖ To assess the present status of these routes and how many times it encountered by law enforcing agencies for sealed.
- ❖ To list out scope or potentiality to establish new pathway to seal the routes.
- ❖ To review the existing policies related to supply reduction.
- ❖ To find out the scope of community involvement to identify and to seal the routes.

Skills and Experience for Individuals

- At least masters degree in social science/Development studies/Economics, minimum 5 years of experience in research.
- The applicant's agency should have previous experience and proven track record of qualitative and quantitative research.
- The applicants must have an experienced team of trained researchers. The agency should submit the signed CVs at least four core team members who would be involved in undertaking the tasks.
- The applicant is also required to submit completion

	<p>certificate for similar assignment carried out in recent past as an evidence of its capability in completing works of similar nature successfully.</p> <ul style="list-style-type: none"> ▪ Organization has minimum 5 years of experience in research ▪ Experience in PPA-2006 & PPR-2008; ▪ Legal trade license ▪ TIN and Vat registration certificate ▪ Study with drug users at National or Divisional level will be given preference. ▪ PhD or any other higher degree in relevant field will be given preference.
Other details	Interested Firm/NGO/ Institution are invited to provide information indicating that they are qualified to perform the services. Brochures, description of similar assignment, experience in similar condition, availability of appropriate professional qualification and experience among staff, logistic support, valid trade license/ registration, VAT, Tax certificate, bank solvency certificate etc. to be submitted.
Selection Criterion	<p>The following criterion will be applied to select the firm for awarding the contract:</p> <ol style="list-style-type: none"> a. Study Methodology: 30 b. Team Composition: 30 c. Overall quality of the proposal: 30 d. Previous experiences on this type research : 10
Deliverable(s)	<ol style="list-style-type: none"> a. Inception report; b. Draft report; c. Printed 250 copies of the final report after approval of the draft report; d. Soft copy of the report (MS word & pdf format); e. A dissemination Workshop.

Brief description of the Assignment	<p>Contraband yaba tablets are increasingly getting popular among young people nowadays in different parts of the world, including Bangladesh. This country is being used as a transit point for trafficking the tablets involving many southeast Asian markets. In fact, our beloved country is touted to be a safe route for yaba drug dealers. Most of these pills come from neighboring Myanmar, India and even from distant Laos. The yaba tablets are smuggled into Bangladesh using the vast bordering areas, waterways and airways</p> <p>International gangs and local smuggler employ a large number of women, students and even teens are also involved in selling the contraband drug, which is often considered as a powerful stimulant.</p> <p>The youth population is becoming highly addicted to it due to wider-open availability of this 'sexually arousing' pill. Consequently, they are falling prey to serious physical and psychological health hazards. They are also becoming prone to various complex diseases like kidney and liver infection, sleeping problems and lower back pain, among others.</p>

	<p>back pain, among others.</p> <p>Yaba tablets, indeed, are increasingly posing a great threat to the valuable lives of our young generation. They are being completely exploited and manipulated by this item. To save our young generation and our future leaders from getting ruined, the government intend to conduct a study <i>to find out the causes and consequences of Yaba addicted.</i></p> <p>Name of the Study:“Underlying causes and consequence of young people are getting more involve in Yaba Addiction in Bangladesh”</p> <p>Overall Objective: To find out the underlying causes and consequences of Yaba Addicted among young generation in Bangladesh.</p> <p>Specific Objectives:</p> <ul style="list-style-type: none"> ▪ Socio-demographic information of the Yaba addicted ▪ Know the underlying cause to get involve in Yaba; ▪ Find out the health consequence of the drug users; ▪ Understand the financial consequence of young Yaba addicted; ▪ Know the study consequence of of young Yaba addicted; ▪ Find out family and social consequence of the drug users; ▪ Provide recommendation how Yaba addicted off from drug and who are most vulnerable to get involve in Yaba

Title of the services	“Drug addiction in Slum Dwellers adjacent to Railway Stations as well as other areas in Bangladesh and appropriate measures against drug abuse”
EoI Ref. No. and date	No. 58.04.0000.007.02.01(Part-3).16-81
Procurement method	QCBS
Budget and source of Fund	GoB (Budget Code: 3257103)
EoI closing Date	05/02/2019
Brief description of the Assignment	<p>A slum is a highly populated urban residential area consisting mostly of closely packed, decrepit housing units in a situation of deteriorated or incomplete infrastructure, inhabited primarily by impoverished persons. While slums differ in size and other characteristics, most lack reliable sanitation services, supply of clean water, reliable electricity, law enforcement and other basic services. Slum residences vary from shanty houses to professionally built dwellings which, because of poor-quality construction or provision of basic maintenance, have deteriorated.</p> <p>Slums form and grow in different parts of the world for many different reasons. Causes include rapid rural-to-urban migration, economic stagnation and depression, high unemployment, poverty, informal economy, forced or manipulated ghettoization, poor planning, politics, natural disasters and social conflicts.</p> <p>Substance abuse is an important health problem throughout the world including Bangladesh, but prevalence and pattern of abuse varies from country to country and in different types of population. Slums have their own social and economic problems so that substance abuse may be different in this population and might be related with these problems. The aim of the present study is to study the prevalence and pattern substances in slum population and way forward.</p>

	<p>Name of the Study: "Drug addiction in Slum Dwellers adjacent to Railway Stations as well as other areas in Bangladesh and appropriate measures against drug abuse"</p> <p>Overall Objective: To find out the causes of drug addiction prevalence is high among the slum dwellers adjacent to railway stations as well as others areas in Bangladesh and way forward and appropriate measures against drug abuse.</p> <p>Specific Objectives:</p> <ul style="list-style-type: none"> ▪ Socio-demographic information of the drug addict in slum dweller adjacent to railway stations and other areas in Bangladesh. ▪ Know the underlying cause to get involved in drug; ▪ Find out the health consequence of the drug users; ▪ Understand the financial consequence of drug addicted; ▪ Find out family and social consequence of the drug users; ▪ Provide recommendation how drug addicted off from drug and who are most vulnerable to get involved in drug/way forward
